

CITY OF ALTAMONTE SPRINGS

APPLICATION FOR PROJECT COMPLETION AND FINAL SITE INSPECTION

The Project Engineer, as the authorized agent of the developer and established by the Project Engineer's Letter of Acknowledgement, will need to review Article XVI - *Subdivision and Site Development-Permitting, Inspections Procedures, and Closeout* of the City's Land Development Code (LDC). Article XVI requires an authorized agent submit an Application for Project Completion and Final Site Inspection **30 to 45 calendar days prior** to the anticipated date of project closeout.

This application, and all associated submittals, must be received and reviewed by the City and determined sufficient prior to the scheduling of a final inspection. The final inspection will be scheduled within five calendar days of the sufficient submittal of this application. This inspection requires the Engineer of Record's attendance along with the appropriate representatives of the City for a walk-through of the site.

All Construction Record Drawings and As-built drawings must be submitted in an archival-quality format on three-mil Mylar. In addition, Article XVI requires that electronic versions of the plans be submitted before project completion.

More information pertaining to these submittal requirements can be found in Article XVI - *Subdivision and Site Development-Permitting, Inspections Procedures, and Project Closeout* of the City's Land Development Code (LDC) which is available via www.municode.com.
